

QAIM MOHAMMAD KHURSHID

Karachi, Pakistan | khurshidqaim@gmail.com | +92 331-2220194 | linkedin.com/in/qaim-mohammad

SUMMARY

Full-stack developer who ships production applications end-to-end. Built a real-time prediction markets dashboard on Next.js, MySQL, and Redis, and a secure study platform serving real users. Comfortable owning the full path from schema design to live deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Node.js, C++, Python, SQL

Frameworks: Next.js (App Router), React, Express.js, Tailwind CSS

Data: MySQL, Prisma ORM, SQLite (WAL) & Turso (libSQL), Redis caching & pub/sub

Backend: REST, Server-Sent Events, JWT in httpOnly cookies, bcrypt, cron workers, rate limiting

DevOps: Vercel, Turso, Railway, Aiven, Upstash, GitHub Actions CI, Git

Testing: Jest, Playwright, live-deployment smoke tests

PROJECTS

PolyWatch — Real-Time Prediction Markets Dashboard

Next.js · TypeScript · MySQL · Prisma · Redis · SSE

- Live dashboard pulling markets from Polymarket with user watchlists, price alerts, and per-market live price charts streamed to the browser via Server-Sent Events.
- Redis caching layer cuts upstream API calls by 90%+; live cache-hit rate exposed on a public stats page.
- JWT auth in httpOnly cookies, bcrypt hashing, and a Next.js middleware enforcing security headers (CSP, Referrer-Policy, Permissions-Policy).
- Automated Node smoke-test suite validates auth flow, API contracts, and security headers against the live deployment.
- Live: polygazeio.vercel.app

ExamPrep — Full-Stack Study Platform

Node.js · Express · better-sqlite3 / Turso · JWT · Vercel

- Sequential day-by-day curriculum unlocking, student progress tracking, and an admin panel for managing users and content.
- Migrated database from in-memory sql.js to better-sqlite3 in WAL mode, eliminating a silent write-loss race condition.
- Re-architected for serverless on Vercel: async dual-backend data layer runs better-sqlite3 locally and Turso (hosted libSQL) in production, so deploys never touch user data.
- JWT in httpOnly cookies, bcrypt (cost 12), CSP-hardened front-end with zero inline scripts, Helmet + scoped per-route rate limiting, graceful SIGTERM shutdown, /healthz for uptime monitoring.
- Live: exam-prep-platform-sandy.vercel.app | Demo login: demo@examprep.com / demo2026

Al-Hamd Granite & Marble — Production Business Website

HTML5 · CSS3 · JavaScript · WhatsApp Business API · SEO

- Currently live and generating qualified B2B leads for a real marble supplier.
- Vanilla-JS product catalog with category filtering; WhatsApp Business API integration sends pre-populated, per-product inquiry messages directly to the business.

Multiplayer Roblox Game

Luau · Roblox Studio

- Server-authoritative architecture with RemoteEvents, synchronized state, XP/leaderstats progression, and persistent player data.

EXPERIENCE

Full Stack Developer Intern — Developer Hub Corporation

Apr 2026 — Present

- Built a full-stack eCommerce web application using React.js (frontend) and Node.js + Express.js (backend), with MongoDB as the database.
- Implemented JWT-based user authentication with protected routes and a role-restricted admin panel for CRUD product management.
- Designed and consumed RESTful API endpoints for product listings, cart management, and user sessions.
- Developed a fully responsive UI (desktop and mobile) with Tailwind CSS, matching Figma design specifications.
- Persisted cart state via localStorage; deployed the application to Vercel/Render with a live production URL.
- Contributed to frontend (React) and backend development across production features within a professional engineering team.

Sales & Operations Intern — Private Marble & Tile Supplier, Karachi

Jun — Aug 2024

- Coordinated customer orders across inventory, pricing, and delivery for a high-SKU product line; managed concurrent client accounts end-to-end.

EDUCATION

B.S. Computer Science — FAST NUCES, Karachi 2024 — 2028 (Expected)

Cambridge International A Levels — TCS PAF Chapter, Karachi 2023
